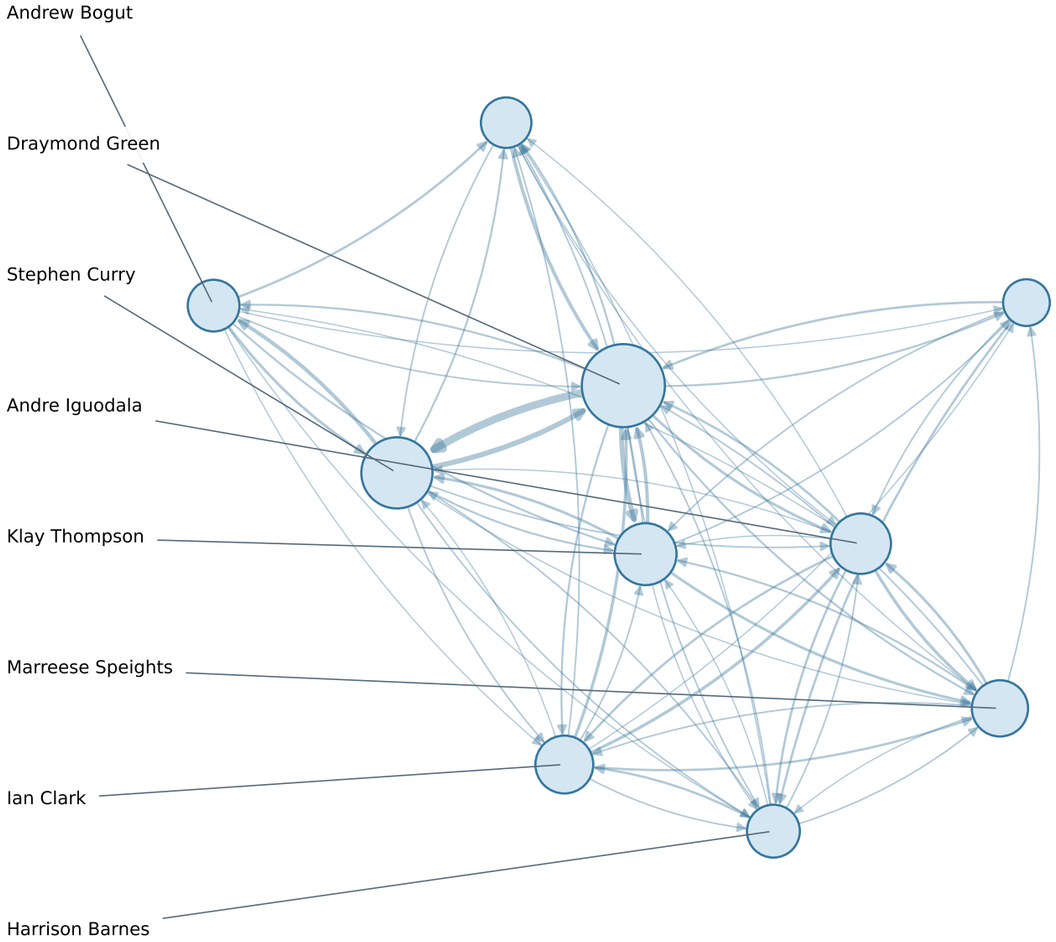
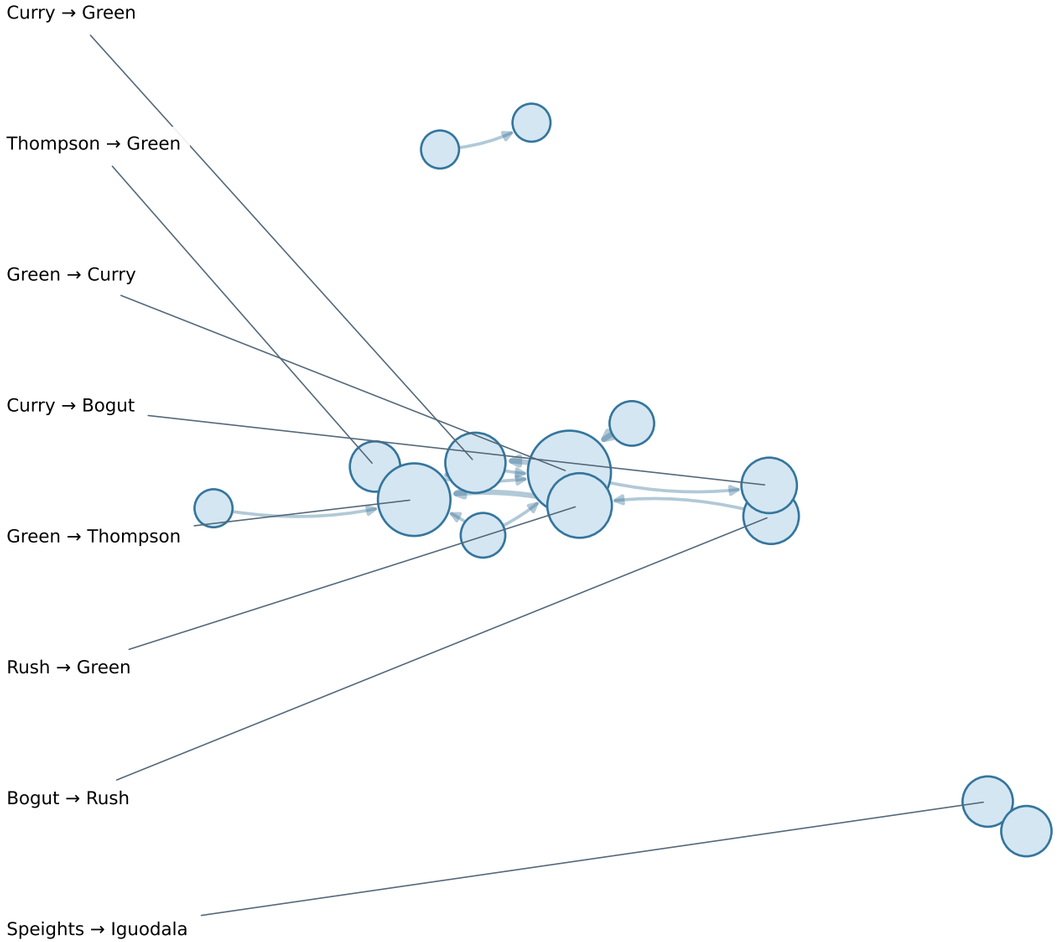
2016-01-04 · inferred tracking sequences · 0021500520

GSW · first-order inferred passes



Second-order: previous→current pair states
Top14 active states shown; full matrices saved



Conservative inferred passes, not annotated events. Sequences stop at uncertain transfers, lineups, gaps and PBP boundaries.
Node size: pass/transition involvement. FR layout is aesthetic; missing outgoing probability rows remain undefined.
